6 function summary() = {
7   Hi! I'm Son, a recently graduated web
8   developer!
9
10
11   I've been coding from a young age and have
12   always been fascinated by websites and
13   applications. I love working with others
14   and creating things that are actually
15   useful and meaningful to people.
16
17   In my free time, you'll probably find me
18   bouldering, gaming, or working on one of
19   my own side projects.
20 }
21
22 function experience() = {
23   Web development internship
24   for [ModelMatic] from [2025 to 2026]
25   I interned at the tech startup ModelMatic
26   for 8 months, where I learned a lot about
27   working and developing in a professional
28   environment.
29
30   MBO 4 Software Development
31   at [Bit Academy] from [2024 to 2026]
32   I studied Software Development at MBO 4
33   level at Bit Academy, where I learned a
34   lot about web development and working with
35   others.
36
37   Driven by a passion for software
38   development and the freedom to work at my
39   own pace, I completed the 3-to-4-year
40   program in just 2 years, graduating cum
41   laude.
42
43   Havo (up to year 4)
44   at [Fons Vitae Lyceum] from [2019 to 2024]
45   I learned the basics of coding and other
46   basic skills during high school, but
47   decided to leave early to pursue an MBO in
48   Software Development.
49
50 }
